For 2 years, the core of musical creativity was the emulation and elaboration. When Mahler would turn a phrase by Brahms, or reorchestrate a Beethoven symphony, it was the tribute of one master to another. To exploit the tumor microenvironment: passive and active tumor targeting of nanocarriers for anti-cancer drug delivery. As Michele Boldrin and David Levine explain, this racket began in the 17th century when government instituted the idea of ownership of ideas, precisely so that the government could crush ideas it didn't like.

And a superstrong case for their position is the open-source software movement. Bastiat's "petition of the candlemakers against the sun" all
