Nigeria 2. Some leaders, as a result, drew an optimistic analogy between G20 cooperation and the Bretton Woods negotiations. Beginning in Halifax and continuing through Lyon, we have encouraged financial regulators and the international financial institutions to take measures to deal

effectively with possible systemic or contagion risks and foster financial stability, without stifling innovation or undermining the benefits of globalization, liberalization and competition. September19toSeptemberAs low- and middle-income countries try to optimize health service provision using their own resources and also foreign aid, macroeconomic policies agreed between their governments and the IMF could have the effect of restraining health spending. Civil society organizations involved in budgetary and health advocacy issues should give greater attention to monitoring and influencing the setting and implementation of annual budgets, which is the key battleground for priority-setting and where actual decisions do not always match the political rhetoric on the importance of health.
