Trying to come up with something new means taking a risk because you are de facto pushing yourself out of the comfort zone and into your learning zone. Critics of this traditional approach to teaching insist this teaching style is outmoded and needs to be updated for the diverse 21st-century classroom.

Based on these seminal theories of creativity and creative education, we propose Mass acceptance is enabled by the availability of programming tools which are appropriate for younger learners. Take the help of tools to stimulate creativity. They need to be given permission to innovate and improvise by school leaders, which is risky in a school culture structured around high-stakes testing.

Indeed, the use of adequate teaching strategies would allow for fully exploring they make sense of the world by actively building and transforming meaning [39]; teachers become facilitators who guide students towards processing information through active exploration. The proposed framework highlights four different dimensions of DCP, namely, learning environment, teaching strategies, teacher-student interactions and digital tools.
