Article Contents. Luis P. In: Human Reproduction Update. Genetics, Evolution and Radiation. Metabolites generated by the gut commensals can bind epithelial cells and other immune cells via ERs and PPARs that are expressed differentially in both sexes Yoshio Koyanagi. Clinical endocrinology. Sex matters in immunity. Hormone manipulation alters the host response to influenza Although supplemental estrogen appears to be protective in the case of UTI, hormone manipulation—such as contraceptive use or hormone replacement therapy—likely has a more nuanced impact on immunity. Of these loci, three appear to be influenced by sex, with one of the three regulating eosinophil infiltration only in infected male mice [33].
