Yarns are made from both natural and synthetic fibre, in filament or staple form. In Richard Arkwright used waterwheels to power Spinning Wheel for the production of cotton cloth, his invention becoming known as the water frame. The Spinning Wheel is on one end, the flyer on the opposite end with typically three legs.

Some upright wheels are even made to fold up small Spinning Wheel that they fit

Questions about this project? Can I share or save it?

When the switch is backwards it spins counter clockwise. However, the Mini is not meant to work as a production spinning wheel.
