Archived from the original on 10 November Sub-Saharan Africa uses significantly less fertilizer than other regions, applying only 10 percent on average of what the rest of the world applies and 2 percent of what China applies. This is due to their fast growth, spines, and attractive flowers. But unless all your basic human needs are met, what good is a school if there is no water. See also: List of Acacia species. Views Read Edit View history. The flowers are yellow and shaped like a cylinder. For an attractive specimen tree with drooping branches, choose the weeping myall.
